

PotBot

Collective Trading Vaults on Solana

github.com/YD811/potbot-v2

Solana Frontier 2026

One vault. One crew. One on-chain identity.

The Problem

- Group trading has no on-chain rails
- Funds rely on personal wallet trust
- No coordination primitive exists
- No accountability for group decisions

PotBot POT

- Shared PDA vault on Solana
- Configurable governance (L0-L4)
 - L0 Autocracy -> L4 Full Consensus
- Jupiter v6 swaps with member voting
- Tamagotchi creature grows with XP
- Telegram bot for mobile management

Shipped

- Anchor programs (pot_vault + duel)
- Next.js 14 frontend + 5-tab POT page
- 3-step vault creation wizard
- grammY Telegram bot with session
- Turborepo monorepo (5 packages)
- devnet deploy pipeline script
